

UNI FIN INVEST

Product Specifications

Version 0.1 – Last Updated: November 2022

Product Specifications Guide

Minimum and Maximum Ticket Size

The minimum and maximum order size is the smallest and largest increment accepted; this is applicable to all order types.

Tick Value

The “Tick” is the minimum amount that the price or value of an instrument may fluctuate pursuant to the market rules of the relevant regulated market. As profit and loss is converted into the account currency, a “Tick Value” is associated with each product and automatically converted to the clients’ accounts currency. For example, if the trading account is denominated in USD, then the profit and loss will be calculated in USD. If a client traded in “FXTGBP”, which is priced in GBP, our platform will automatically convert profit and loss into USD. The Tick Value conversion rate in this example, would be the GBPUSD exchange rate.

Trading Steps

“Trading Steps” relates to the minimum order size increment accepted and applicable to all order types. For example, suppose the minimum allowed tick size for an instrument is 0.05, clients are only able to trade in the minimum ticket size or multiples thereof, in this case 0.05, 0.10, 0.15 and so on.

Contract Size

UNI FIN INVEST utilizes a “Lot” based trading system, It is a standardized amount that tells buyers and sellers exact quantities that are being bought or sold, based on the terms of the contract.

Leverage

Leverage is a ratio representing the level of exposure you have to a trade. Using leverage means you can control trades of higher value than the margin you hold.

Margin Requirements

Margin requirements differ by the type of instrument and may be subject to change according to the underlying liquidity and volatility of the instrument. Margin Requirement Rates are displayed in the product specification list below.

Trading Hours

Trading hours for CFDs products are based on when their underlying reference markets are open, or the times liquidity providing partners are streaming prices. During session hours, clients can set pending orders, open and close trades, and to adjust price levels. UNI FIN INVEST CFDs will not be open for trading during holidays in which the reference markets are closed. When the market is closed, clients will not be able to take any action on positions or pending orders.

Session Break

Clients should also be informed that CFD products may have an intraday break in addition to a daily closing time. Clients will not be able to adjust or close existing positions, or open new positions during the session break.

Finance Charges - Overnight Rollover (Swaps)

UNI FIN INVEST daily interest debit or credit amounts (hereafter “rollover” or “Swap”) are based on the total face value of the open positions. All open positions are rolled automatically to the next trading day. Depending on whether an order is long (buy) or short (sell), It could either be debited or credited with rollover interest daily. Please note that all open positions in our CFD products at the close of business on Friday incur a 3-day rollover debit/credit.

Corporate Actions on Indices

To be eligible to receive dividends, clients must hold a CFDs position in respect of the relevant Equity or Index on the ex-dividend date. The Index markets may be subject to a dividend adjustment as to reflect that the underlying asset will open at a lower level post-dividend date. When a Corporate Action (CA) takes place from an individual stock which is constituent of a stock index, UNI FIN INVEST will book an adjustment to the client’s account to reflect the effect this corporate action has on the stock index. The adjustments will be made on a timely basis, however, as we are dependent upon notification from an external third party, we shall not be liable for the consequences of any delayed adjustments.
